1 MW Solar Power Plant Proposal

PM KUSUM Yojana (Component A)

Presented by: **KNS Enterprises**

Location: Panna, Madhya Pradesh

Date: February 2026

Made with GAMMA

OVERVIEW

Executive Summary: A Sustainable Investment

This proposal outlines a robust plan for a **1 MW (AC) / 1.2 MWp (DC)** grid-connected solar power plant under the **PM KUSUM Component-A scheme**. Designed for sustainable energy generation and long-term income, this project offers a compelling investment opportunity.

1

High-Yield Generation

Expected to generate **1.5 – 1.6 Million Units per year**.

2

Grid Integration

Seamless connectivity at **11 kV / 33 kV** to the local DISCOM.

3

Clean Energy Asset

A reliable, long-term asset contributing to India's renewable energy goals.

Made with GAMMA

TECHNOLOGY

Advanced Technical Configuration for Peak Performance

Our proposal leverages cutting-edge solar technology to ensure maximum efficiency and durability. Every component is selected for its proven reliability and performance under diverse conditions.

- **Solar Modules:** High-efficiency Mono-Crystalline PERC Half-Cut (540Wp+).
- **Approved Makes:** Waaree, Adani, Goldi (ALMM Listed for assurance).
- **Inverters:** Robust String Inverters (100 kW – 125 kW) for optimal energy conversion.
- **System Efficiency:** >98.5% with advanced remote monitoring capabilities.
- **Mounting Structure:** Hot Dip Galvanized (80 Micron) for superior corrosion resistance.
- **Wind Load Design:** Engineered to withstand extreme winds up to 150 km/h.
- **Monitoring:** SCADA-based system for real-time performance tracking and fault detection.

RESPONSIBILITIES

Clear Scope of Work for Seamless Execution

A defined division of responsibilities ensures efficient project management and timely completion, minimizing delays and maximizing operational readiness.

KNS Enterprises (EPC Contractor)

- Comprehensive Site Survey & Detailed Engineering.
- Supply of high-quality Solar Modules, Inverters & Balance of System (BOS).
- Full Installation & Commissioning process.
- Grid Synchronization expertise.
- CEIG & DISCOM Liaisoning for regulatory compliance.
- Rigorous Testing & Performance Validation.

Client / Developer

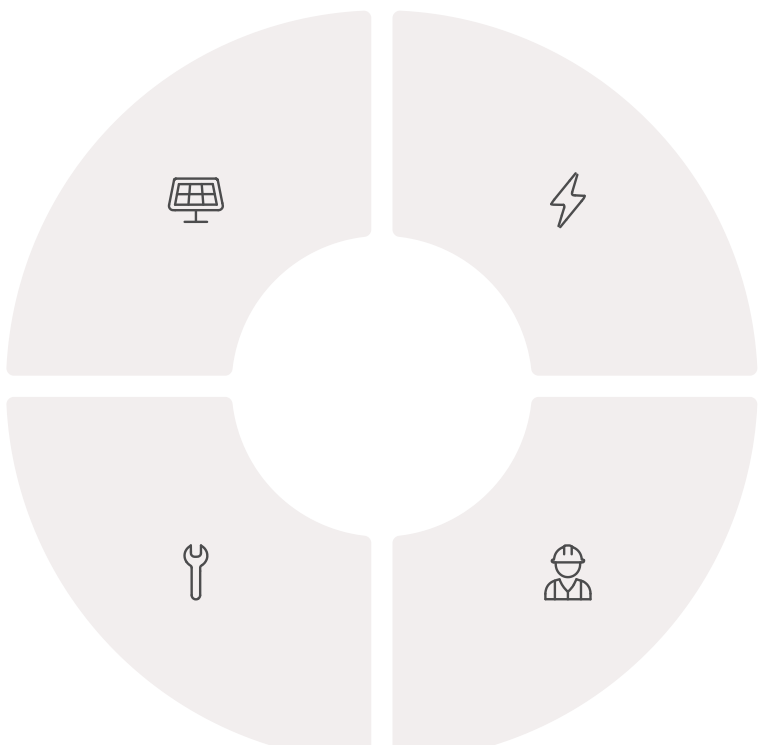
- Ensuring Land Availability & Site Leveling.
- Establishing Boundary & Security Fencing.
- Providing Water Supply for Module Cleaning.
- Managing Government & Regulatory Charges.

Made with GAMMA

INVESTMENT

Financial Proposal: A Strategic Investment

The total estimated project cost of **₹ 4.09 Crores** (approx., including GST) represents a competitive investment for a high-yield, long-term asset. This project benefits from low maintenance needs and a government-backed scheme, ensuring stable returns.



Solar Modules

~52% of total cost

Inverters & Electrical

~20% of total cost

Installation & Misc.

~10% of total cost

Civil & Structure

~18% of total cost

This project is characterized by low maintenance requirements, promises long-term stable returns, and is supported by a government-backed scheme.

RETURNS

Attractive ROI & Revenue Analysis

This solar plant offers an exceptional return on investment through stable energy sales and significant long-term income potential, making it a highly attractive passive income model.

- **PPA Tariff:** Assured rates of **₹ 3.07 – ₹ 3.14 per unit**.
- **Annual Energy Generation:** Approximately **1,500,000 units**.
- **Expected Annual Revenue:** Around **₹ 46.5 Lakhs**.
- **Payback Period:** Rapid return on investment within **4.5 – 5 years**.
- **Project Life:** A substantial operational life of **25 years**.

This project presents a strong, long-term passive income model, generating consistent revenue for decades.

ADVANTAGES

Key Benefits: Why Choose Solar Under PM KUSUM

Investing in this solar power plant under PM KUSUM Component-A provides a multitude of benefits, blending financial security with environmental stewardship.

Government Support

Backed by the robust PM KUSUM Scheme, ensuring policy stability and incentives.

Assured Income

Stable and reliable income stream from power sale to DISCOM.

Clean Energy

Contributes to a greener future with a clean and renewable energy source.

Low O&M

Minimal operating and maintenance costs ensure higher profitability.

Long Asset Life

An asset designed for a 25+ year operational life, providing sustained returns.

Eco-Friendly

An environmentally friendly and sustainable investment for generations.

Made with GAMMA

TIMELINE

Expedited Project Timeline for Quick Deployment

Our efficient project plan ensures that your solar plant will be fully operational and generating revenue in a short timeframe, minimizing the waiting period for returns.

Site Survey

Design and assessment — 2 weeks

Procurement

Equipment sourcing — 6–8 weeks

Installation

Mounting and wiring — 4–5 weeks

Testing

Commissioning & grid sync — 1–2 weeks

The entire project is engineered for completion in approximately **3 months**, from initial survey to grid synchronization, enabling rapid activation of your investment.

PARTNERSHIP

About KNS Enterprises: Your Trusted EPC Partner

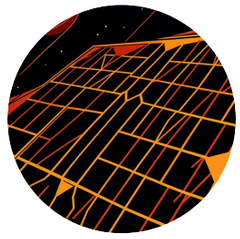
KNS Enterprises is a leading solar EPC contractor dedicated to delivering high-quality, reliable solar solutions. Our expertise ensures end-to-end project success and sustained performance.

Experienced Contractor

Years of experience in solar EPC projects, ensuring seamless execution.

End-to-End Execution

From design to commissioning, we manage every phase of your project.



Quality Focused

Commitment to superior quality components and meticulous installation.

Strong Technical Team

A dedicated team of experts ensuring optimal performance and efficiency.

Proven Expertise

Demonstrated success in complex installation and commissioning.

After-Sales Support

Reliable and responsive support for long-term operational peace of mind.
